Text:

...shock in Thailand was felt around the world. Both the event itself and its causes confirm the interconnected nature of the global economy that Thomas Friedman described in his book The...

...government to float the Thai baht caused a freefall in both

the value of
the currency and the stock market—in weeks, the baht lost
approximately half its value. Prior to...

...government had tried to sustain the value of the baht by using
its US
dollar exchange reserves to buy baht. This rapidly depleted and
squandered Thai foreign exchange reserves since the baht was
pegged
to the US dollar, which was rising in value thanks to the US
economic boom
of the late 1990s. The economic crisis quickly spread to other
Asian
countries, such as South Korea, Indonesia, Malaysia, and the
Philippines,
and then...

Abstract:

...markets during 1981-1987 to a new period (1988-1993). It also uses a different spread strategy than Carter to see if the same conclusions hold for canola and soybean as well as Canadian feed wheat and American wheat futures. The findings confirm that in the 1981-1987 period there were no opportunities for intermarket spread profit between canola and soybean oil futures and between feed wheat and wheat futures.
The...

...some additional profits. It also finds that these opportunities are neither due to changes in currency values over time, nor to the use of weekly or daily exchange rates. Nevertheless, nonparametric tests show that spread profits are statistically insignificant.
